¹Mile post data from TRC 11/20/2014

²Digitized streams are approximated using reconnaissance-level verification and mapping from off-site resource review/interpretation

³U.S. Army Corps of Engineers (USACE), 2005. "Regulatory Guidance Letter. Subject: Ordinary High Water Mark Identification." No. 05-05.

⁴Stream flow regime determined based on qualitative observations of in stream hydrology indicators and geomorphic characteristics and are subject to professional judgment.

⁵Watershed size was determined from Vermont ANR River Management Program mapping and U.S. Geological Survey StreamStats online application.

⁶Under Vermont Water Quality Standards (Vt. Code R. 12.004.052), Effective October 30, 2014 all of the streams mapped are considered Class B Waters

⁷List of streams from the 2012 Vermont 303(d) list
